ELSEVIER

European Journal of Operational Research 82 (1995) 647–648

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 82

1 Mathematical models of brand choice behavior
A.K. Manrai

18 Application of goal programming in project selection decision – A case study from the Indian Coal mining industry
K. Mukherjee and A. Bera

26 Process technologies, learning and brand proliferation
M.M. Tombak

39 A fuzzy set model for market share and preference prediction
I.B. Turksen and I.A. Willson

53 Modeling global market entry decision by fuzzy logic with an application to country risk assessment
J.B. Levy and E. Yoon

79 Qualitative multicriteria methods for fuzzy evaluation problems: An illustration of economic-ecological evaluation
G. Munda, P. Nijkamp and P. Rietveld

98 Warehouse–retailer system with stochastic demands – Non-identical retailer case
E.P. Chew and L.C. Tang

111 Financial planning with fractional goals
M.H. Goedhart and J. Spronk

125 Preventive maintenance with limited historical data
E.A. Silver and C.-N. Fiechter

145 Verification and validation of simulation models
J.P.C. Kleijnen

163 Water supply operations during drought: A discrete hedging rule
J.-S. Shih and C. ReVelle

176 Tabu search for the multilevel generalized assignment problem
M. Laguna, J.P. Kelly, J.L. González-Velarde and F. Glover

190 Exact and approximation algorithms for the operational fixed interval scheduling problem
L.G. Kroon, M. Salomon and L.N. Van Wassenhove

206 Avoiding anomalies in the MT2 algorithm by Martello and Toth
D. Pisinger

209 A one-vendor multi-buyer integrated inventory model: A comment
S.K. Goyal

Special Issue: OR Models for Maintenance Management and Quality Control

211 OR Models for Maintenance Management and Quality Control
F.A. Van der Duyn Schouten and C.S. Tapiero

214 The marginal cost analysis and its application to repair and replacement policies
M.P. Berg

225 Integrating optimisation, priority setting, planning and combining of maintenance activities
R. Dekker

241 An integrated and structured approach to improve maintenance
S.G. Vanneste and L.N. Van Wassenhove

258 A simple condition monitoring model for a direct monitoring process
A.H. Christer and W. Wang

270 A Bayesian failure model based on isotropic deterioration
J.M. van Noortwijk, R.M. Cooke and M. Kok

283 Optimal maintenance policies in random environments
S. Özekici
295 Optimal repairman assignment in two symmetric maintenance models
G. Koole
302 *N* parallel queueing systems with server breakdown and repair
P. Wartenhorst
323 Maintenance optimization of a production system with buffer capacity
F.A. Van der Duyn Schouten and S.G. Vanneste
339 Time scale decomposition in production planning for unreliable flexible manufacturing systems
A. Haurie
359 Turnpikes in flow control models of unreliable manufacturing systems
A. Haurie and Ch. van Delft
373 Contract design and the control of quality in a conflictual environment
D.J. Reyniers and C.S. Tapiero

383 Activity nets: A guided tour through some recent developments
S.E. Elmaghraby
409 On the development of educational policies
L. Valadares Tavares
422 Key features for model building decision support systems
M. Binbasioglu
438 The strategic value of flexibility in sequential decision making
S. Benjaafar, T.L. Morin and J.J. Talavage
458 Preference programming through approximate ratio comparisons
A.A. Salo and R.P. Hämäläinen
476 Proper efficiency and cardinal utilities in multicriteria decision making
Z. Huang, S.X. Li, V. Raghavan and D.B. Sun
490 The Conflict Analysis Method: bridging the gap between ELECTRE, PROMETHEE and ORESTE
G. van Huylenbroeck
503 ZAPROS-LM – A method and system for ordering multiattribute alternatives
O.I. Larichev and H.M. Moshkovich
522 Comparison of the REMBRANDT system with analytic hierarchy process
D.L. Olson, G. Fliedner and K. Currie
540 Heuristics for scheduling in flowshop with multiple objectives
C. Rajendran
556 Multiobjective water resources investment planning under budgetary uncertainty and fuzzy environment
Sutardi, C.R. Bector and I. Goulter
592 Simulated annealing for manufacturing systems layout design
A. Souilah
615 On a new class of Bilevel Programming Problems and its use for reformulating Mixed Integer Problems
A. Frangioni
647 Contents Volume 82
